# ST. PHILOMENA'S COLLEGE (AUTONOMOUS), MYSORE <br> PG DEPARTMENT OF ECONOMICS <br> QUESTION BANK (Revised Curriculum 2018) <br> SECOND YEAR- THIRD SEMESTER (2019-21 Batch) 

COURSE TITLE (PAPER TITLE): RESEARCH METHODOLOGY AND DATA ANALYSIS
Sub: Code- C0210
QP Code: 51201
Unit
Sl. No Questions
What is research?
Marks
1
State hypothesis
What does social science research means?
Write two objectives of research?
Define pure research.
What is exploratory research?
What is a survey?
Define Quota samples?
What do you mean by scientific approach?
Define analytical Research?
What is sample?
Give the meaning of Literature Review.
Define Historical Research.
Mention any two limitations of Case study.
Mention any two objectives of Literature Review.
Write any two steps involved in research process.
What are the two types of Sampling Designs?
What does Sampling means?
Define Probability sampling technique.Define Non-Probability sampling technique.22

What are the characteristics of Quota sampling?
What does case study refers to?What do you mean by field editing?22
What is evaluation literature? ..... 2Define Action Research.2

Mention the data sources available for cooperation.
Define Sampling Error.
What is coding?
What does editing means?
What is transcription editing?
Define hypothesis.
Distinguish between the Type and Type two error.
What is the formula for single sample Test?
Write the formula of single sample variance test.
When $t$ - distribution is used?
When binomial distribution is used?
Based on the two sample show below, can we infer at 5\% significance level that the location of population 1 is to the left of the location of population 2? Use Wilcoxon rank test.

Sample 1:22,23,20
sample 2: 18, 27,26
Use the sign test to test the hypothesis at the $5 \%$ level of significance that the median number of hours a student before mathematics test is 3 .
$\mathbf{6 , 5 , 1 , 2 , 2 , 5 , 7 , 5 , 3 , 7 , 4 , 7 .}$
Use the Wilcoxon signed-rank test to test the median life expectancy of the tyres is not greater than 60,000 miles at $5 \%$ level of significance :( Critical Value- 6)
$62,63,59,56,61,60,64,57$
A coin is tossed 20 times and the following sequence of heads (H) and tails (T) is obtained. Use run test to determine at $5 \%$ level of
significance if the coin is unbiased.

## Н Т ТНН Т ТН ТННН Т ТННТ ННН

Define factor analysis.
What are the important methods of factor analysis? 2
What do you mean by centroid method?
Define principle component method.
What do you mean by maximum likelihood method? (

What are the merits and demerits of factor analysis?
Distinguish between R-type and Q-type of factor analysis.
Distinguish between one-way and two-way ANOVA.
What are the normality assumptions? 2
When the Z-distribution is used?
What are the purposes of chi-square test? 2
Distinguish between footnotes and bibliography.
Distinguish between Univariate and multivariate data analysis.
Distinguish between descriptive and inferential statistics.

What do you mean by non-parametric tests?

What are the types of reports? 2
What do you mean by documentation? 2
What are the different types of scales?
Distinguish between time-series and cross-sectional data.
Distinguish between qualitative and quantitative variables.
What do you mean by dummy variable? 2
Distinguish between correlation and regression.
Distinguish between simple and multiple regressions.
What are the types of correlation? 2
When we use paired sample t-test? 2
Define ANACOVA.
Define Goodness of fit. 2
What are the conditions for applying the Chi-square test?
What are the uses of Chi-square test? 2
Distinguish between null and alternative hypothesis.
A sample of 900 members is found to have a mean of 3.47 cm . Can it be reasonably regarded as a simple sample from a large population with mean 3.23 cm and standard deviation 2.31 cm ?

What are the limitations of non-parametric test?
What are the factor scores?

What are the main objectives of factor analysis?
Mention the features of good research report. 2
What do you mean by rewriting and polishing of report?
What are the types of bibliography is followed in research? ..... 2
What do you mean by technical report? ..... 2
What do you mean by popular report? ..... 2
What are the research ethics? ..... 2
Explain various types of research. ..... 5
Write a note on sampling techniques. ..... 5
Describe the steps involved in research. ..... 5
Explain different types of hypothesis. ..... 5
Explain the characteristics of a good sample. ..... 5
Explain simple random sample with an example. ..... 5
Explain the objective of social science research. ..... 5
Write a note on descriptive and diagnostic research. ..... 5
Critically examine the exploratory research. ..... 5
Explain the importance of literature review. ..... 5
Describe pure and analytical research. ..... 5
Explain the procedure of case study. ..... 5
Briefly explain the non-probability sampling method. ..... 5
Write a note on footnotes and bibliography. ..... 5
Explain any two types of report? ..... 5
Write a difference between parametric and non-parametric test. ..... 5
Write a note one editing. ..... 5
What are the factors to be considered for identification of research problem. ..... 5
What constitute a research topic? ..... 5
What are the limitations encountered with a research project? ..... 5

| Sample <br> A | $\mathbf{N}=10$ | $\mathbf{S}_{1}{ }_{1}=13.3$ |
| :--- | :--- | :--- |
| Sample <br> B | $\mathbf{N}=12$ | $\mathbf{S}^{2}{ }_{2}=28.5$ |

Intelligence test on two groups of boys and girls gave the following results: is there a significant difference in the mean scores obtained by boys and girls?

|  | Girls | Boys |
| :--- | :--- | :--- |
| No of samples | 150 | 250 |
| Average | 75 | 70 |
| S.D | 15 | 20 |

Sample of sales in similar shops two towns are taken for a new product.

| Town | Mean sales | Variance | Size of samples |
| :--- | :--- | :--- | :--- |
| 1 | 42 | 4.3 | 6 |
| 2 | 55 | 5.1 | 8 |

Is there any differences in sales in the two towns? Use 5\% level of significance (Table value-5.14)

A random sample of 17 agriculture labors have a mean income of 30000 and a S.D of $\mathbf{8 0 0 0}$. A random sample of 18 nonagricultural works have mean income of 33000 and a S.D of 8300 .test the claim at $=0.05$ that the mean annual income of agriculture and nan-agriculture workers are not same. (Critical value $=2.042$ )

Following data show dividend yield between stocks listed BSE and NSE.is there a difference in average yield between two markets? Test at percent level of significance critical value=1.96.

|  | BSE | NSE |
| :--- | :--- | :--- |
| $\mathbf{N}$ | $\mathbf{2 2}$ | $\mathbf{2 8}$ |
| Mean | 4.21 | $\mathbf{3 . 6 2}$ |
| SD | $\mathbf{1 . 4 0}$ | $\mathbf{1 . 2 2}$ |

Heights of teachers : 63,65,58,69,71,72
Heights of soldier: $61,62,65,66,69,69,70,71,72,73$ in inchers.
Can the heights of teachers and soldiers regarded as same on an average table value $=2.145$

Two random samples gave the following results. Use F-test to find whether the samples come from the same normal population at $5 \%$ level of significance.

|  | Size | Sample Mean | Sum of Squared |
| :--- | :--- | :--- | :--- |
| Sample I | $\mathbf{1 0}$ | $\mathbf{1 5}$ | $\mathbf{9 0}$ |
| Sample II | $\mathbf{1 2}$ | $\mathbf{1 4}$ | $\mathbf{1 0 8}$ |

Test whether two samples have same standard deviation and being to one and same universe.

| Sample A | $\mathbf{N}=10$ | $\mathbf{S}^{2}{ }_{1}=\mathbf{1 3 . 3}$ |
| :--- | :--- | :--- |
| Sample B | $\mathbf{N}=12$ | $\mathbf{S}^{\mathbf{2}}{ }_{\mathbf{2}}=\mathbf{2 8 . 5}$ |

Find the critical difference between the data given below of three sales men $X, Y, Z$ by using this results:( Critical Value-3.98)

| Source of Variation | Sum of Square | Degrees of freedom | Mean Square |
| :--- | :--- | :--- | :--- |
| Between samples | $\mathbf{1 0}$ | 2 | 5 |
| Within samples | $\mathbf{3 0}$ | 11 | 2.75 |
| Total | 40 | 13 |  |

Find the critical difference between the data given below of three sales men $A, B, C$, by using this results.

| Source of Variation | Sum of Square | Degrees of freedom | Mean Square |
| :--- | :--- | :--- | :--- |
| Between samples | $\mathbf{2 0}$ | $\mathbf{2}$ | $\mathbf{1 0}$ |
| Within samples | $\mathbf{3 0}$ | $\mathbf{1 0}$ | $\mathbf{3}$ |
| Total | $\mathbf{5 0}$ | $\mathbf{1 2}$ |  |

Find the critical difference between the data given below of three sales men $A, B, C$, by using this results.

| Source of Variation | Sum of Square | Degrees of freedom | Mean Square |
| :--- | :--- | :--- | :--- |
| Between samples | $\mathbf{4 0}$ | 2 | $\mathbf{2 0}$ |
| Within samples | $\mathbf{6 0}$ | $\mathbf{1 2}$ | 5 |
| Total | 100 | $\mathbf{1 4}$ |  |

A manufacturing company has purchased three new machines of different makes and wishes to determine whether one of them is faster than the others in producing a certain output, Five hourly production figures are observed at random from each machine and the results are. Use analysis of variance and determine whether the machines are significantdifferent in their mean speed (Given at 5\% level F = 3.89).

| Observation | $X$ | $Y$ | $Z$ |
| :--- | :--- | :--- | :--- |
| 1 | 5 | 3 | 4 |
| 2 | 3 | 9 | 3 |
| 3 | 6 | 8 | 8 |
| 4 | 8 | 2 | 5 |
| 5 | 3 | 5 | 8 |

Fit the one-way ANOVA table for the data given below at 5\% level of significance:(Critical Value-2.62)

| Bhopal | 19 | $\mathbf{8}$ | $\mathbf{1 2}$ | $\mathbf{1 4}$ |
| :--- | :--- | :--- | :--- | :--- |
| Indore | $\mathbf{1 4}$ | $\mathbf{1 0}$ | $\mathbf{1 0}$ | $\mathbf{6}$ |
| Gwalior | $\mathbf{4}$ | $\mathbf{1 0}$ | $\mathbf{8}$ | $\mathbf{8}$ |

M.Com. Class of three universities in Madhya Pradesh. Their scores were found as followbetween the scores of students in the three universities. Test whether there is any significant difference in the scores at $5 \%$ level of significance.(Critical Value-3.44)

|  | University Scores |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| A | $\mathbf{9 0}$ | $\mathbf{7 0}$ | $\mathbf{6 0}$ | $\mathbf{5 0}$ | $\mathbf{8 0}$ |
| B | $\mathbf{7 0}$ | $\mathbf{4 0}$ | $\mathbf{5 0}$ | $\mathbf{4 0}$ | $\mathbf{5 0}$ |
| C | $\mathbf{6 0}$ | $\mathbf{5 0}$ | $\mathbf{6 0}$ | $\mathbf{7 0}$ | $\mathbf{6 0}$ |

Study the performance of three detergents at three different water temperatures, the following 'whiteness' readings were obtained with specially designed equipment Perform a one-way analysis of variance, using $\mathbf{5 \%}$ level of significance (given $\mathrm{F}=$ ).

|  | A | B | C |
| :--- | :---: | :---: | :---: |
| Cold Water | 5 | 5 | 6 |
| Warm Water | 4 | 5 | 6 |
| Hot Water | 5 | 4 | 5 |

To test the claim that the median age of mathematics faculty in the state community colleges is at least 42 years. The results from a random sample of $\mathbf{1 6}$ mathematics faculty gave the following ages. ( in years). Use sign test at the $\mathbf{5 \%}$ level of significance.

## significance

| City A | $\mathbf{4 2}$ | $\mathbf{2 0}$ | $\mathbf{5 1}$ | $\mathbf{3 9}$ | $\mathbf{5 7}$ | $\mathbf{6 0}$ | $\mathbf{2 3}$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| City B | $\mathbf{3 0}$ | $\mathbf{4 2}$ | $\mathbf{2 5}$ | $\mathbf{2 9}$ | $\mathbf{3 5}$ | - | - |

A group of 25 men (M) and 15 women(W) queue up to purchase the tickets for the premier show of a movie in the following order. Test for the randomness of the people in the queue at $5 \%$

| Series-X | 8 | 7 | 6 | 9 | 5 | 4 | 10 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Series-Y | 10 | 10 | 11 | 14 | 9 | 9 | 12 |

Find out Rank coefficient of correlation between sales and profits of ten firms.

| Sales | $50,50,55,60,65,65,65,60,60,50$ |
| :--- | :--- |
| Profits | $11,13,14,16,16,15,15,14,13,13$ |

Profits $11,13,14,16,16,15,15,14,13,13$
Distinguish between parametric and non-parametric tests.

Write a note on data analysis.
What are the steps involved in hypothesis testing? 5
Distinguish between descriptive statistics an inferential Statistics.
What are the uses of the distribution or t-test.
Write a note on Steps in computing ANOVA.
Write a note on significance of parametric tests.
Write a note on significance of non-parametric tests.
What are the importances of report writing?
What are the objectives of factor analysis?
What are the assumptions of factor analysis? 5
Briefly discuss the principal component method. 5
Explain the steps of report writing. 5
Briefly discuss the different types of reports. 5
Write a note on report writing and its presentation. 5
Describe the technique of analysis of variance. What are the
various steps to carrying out the analysis?
Define F-test. What are the assumptions on which it is based? 5
What are the assumptions of analysis of variance? 5
What is meant by the word treatment in ANOVA? 5
Describe the technique of ANOVA in two way classification
model.
Explain the limitations of hypothesis testing. 5
Write a note on research ethics. 5
Briefly discuss the steps of technical report writing. 5
Briefly discuss the steps of popular report writing. 5
Evaluate the writing of research report. 5
Explain bibliography and its importance in context of research report.

Briefly discuss the alternative methods in both parametric and
non-parametric test.

Discuss the research problems in different functional areas of economics.

List and explain the steps of research process.
10
Critically examine the relative importance of different research methods.

Assume a research topic of your choice and give the complete format of its research report.

Explain the relative importance and linkages of objectives, hypotheses testing and policy imperatives.

Explain the sources of information for literature review.
Discuss about case study method and statistical method in conducting research study.

Examine importance of research plan and its preparation before starting research study.

Discuss major categories of documents in research.
How to present a good research report? Discuss.
Discuss regression analysis from the point of view of the analysis of variance.

Discuss the problem of multicollinearity in multiple regression estimation.

How is methodology important in research
Explain the characteristic of research? ..... 10
What do you mean by probability and non-probability sampling techniques? ..... 10
How does analysis and interpretation are done in research? ..... 10
Explain about different types of social science research. ..... 10
Discuss relative merits of different methods of data collection ..... 10
Write about different methods of samplingExplain briefly the multi-stage stratified sampling method andmention how it is different from simple random samplingmethod.

Explain briefly the importance of time series data analysis
Explain the uses of graphical representation of statistical analysis in research.

What is hypothesis? What are the characteristics of a good research hypothesis?

What is tabulation? Narrate the characteristics of a good table. 10
Explain the importance of footnote reference and bibliography in research.

The following table gives the number of units produced per day by two workers A and B for a number of days: Test at $5 \%$ level of significance should these results be accepted as evidence that $B$ is the more stable worker.

| A | $\mathbf{4 0}$ | $\mathbf{3 0}$ | $\mathbf{3 8}$ | $\mathbf{4 1}$ | $\mathbf{3 8}$ | $\mathbf{3 5}$ | $\mathbf{-}$ | $\mathbf{-}$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| B | $\mathbf{3 9}$ | $\mathbf{3 8}$ | $\mathbf{4 1}$ | $\mathbf{3 3}$ | $\mathbf{3 2}$ | $\mathbf{4 9}$ | $\mathbf{4 9}$ | $\mathbf{3 4}$ |

Answer using t-test whether the following two samples drawn from same population at $5 \%$ level of significance:

| Sample I | $\mathbf{1 7}$ | $\mathbf{2 7}$ | $\mathbf{1 8}$ | $\mathbf{2 5}$ | $\mathbf{2 7}$ | $\mathbf{2 9}$ | $\mathbf{2 7}$ | $\mathbf{2 3}$ | $\mathbf{1 7}$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Sample II | $\mathbf{1 6}$ | $\mathbf{1 6}$ | $\mathbf{2 0}$ | $\mathbf{1 6}$ | $\mathbf{2 0}$ | $\mathbf{1 7}$ | $\mathbf{1 5}$ | $\mathbf{2 1}$ | - |

Students were given intensive coaching and 5 tests were conducted in a month. The scores of tests 1 and 5 are given below. Does the scores from test $\mathbf{1}$ to 5 shown an improvement.
Test at 5\% level of significance .( critical value -2.101)

| No of Students | 1 | 2 | 3 | 4 | 5 | 6 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Marks in 1 $^{\text {st }}$ test | 60 | 41 | 70 | 55 | 62 | 38 |
| Marks in 2 ${ }^{\text {nd }}$ test | 68 | 51 | 84 | 63 | 72 | 50 |

Ten young recruits were put through a strenuous physical training programme by the army. Their weights (in kg ) were recorded before and after with the following results: using 5\% level of significance concludes that the programme affects the average weight of young recruits.

| Recruit | $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | $\mathbf{6}$ | 7 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Weight before | $\mathbf{1 2 7}$ | $\mathbf{1 9 5}$ | $\mathbf{1 6 2}$ | $\mathbf{1 7 0}$ | $\mathbf{1 4 3}$ | $\mathbf{2 0 5}$ | $\mathbf{1 6 8}$ |
| Weight after | 135 | $\mathbf{2 0 0}$ | $\mathbf{1 6 0}$ | $\mathbf{1 8 2}$ | $\mathbf{1 4 7}$ | $\mathbf{2 0 0}$ | $\mathbf{1 7 2}$ |

Six students were given intensive coaching and tests conducted in a month. The scores of two the tests are given below. Does the score from test 1 to test 2 shows an improvement? Use 5\% level of significance (table value-2.23)

| No of students | $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | $\mathbf{6}$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Marks in test 1 | $\mathbf{5 0}$ | $\mathbf{4 2}$ | $\mathbf{5 1}$ | $\mathbf{2 6}$ | $\mathbf{3 5}$ | $\mathbf{4 2}$ |
| Marks in test 2 | $\mathbf{6 2}$ | $\mathbf{4 0}$ | $\mathbf{6 1}$ | $\mathbf{3 5}$ | $\mathbf{3 0}$ | $\mathbf{5 2}$ |

Data given in the show the sales of commodity based on three marks strategies. Con you infer the mean sales of all three
value $=4.10$

| Quality | Price | Convenience |
| :--- | :--- | :--- |
| 5 | 10 | 3 |
| 4 | 7 | 2 |
| 6 | 8 | 5 |
| 2 | 5 | 4 |

The marks scrod by ten students in economics are as follows: Can we infer that the variance of the distribution of all the students from the sample of 10 has been taken is equal to 10 ?

Test at $5 \%$ and $\mathbf{1 \%}$ level of significance.

| SI.No | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Marks | 38 | $\mathbf{4 0}$ | $\mathbf{4 5}$ | $\mathbf{5 3}$ | $\mathbf{4 7}$ | $\mathbf{4 3}$ | $\mathbf{5 5}$ | $\mathbf{4 8}$ | $\mathbf{5 2}$ | $\mathbf{4 9}$ |

Two random samples drawn from two normal population are given test using variance at $5 \%$ and $\mathbf{1 \%}$ level of significance whether the two populations have the same variance.

| Sample 1 | $\mathbf{2 0}$ | $\mathbf{1 6}$ | $\mathbf{2 6}$ | $\mathbf{2 7}$ | $\mathbf{2 3}$ | $\mathbf{2 2}$ | $\mathbf{1 8}$ | $\mathbf{2 4}$ | $\mathbf{2 5}$ | $\mathbf{1 9}$ | $\mathbf{-}$ | - |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Sample 2 | $\mathbf{2 7}$ | $\mathbf{3 3}$ | $\mathbf{4 2}$ | $\mathbf{3 5}$ | $\mathbf{3 2}$ | $\mathbf{3 4}$ | $\mathbf{3 8}$ | $\mathbf{2 8}$ | $\mathbf{4 1}$ | $\mathbf{4 3}$ | $\mathbf{3 0}$ | $\mathbf{3 7}$ |

The following table gives the number of units of production per day turned outby four different types of machines. Using the analysis of variance (i) test the hypothesis that the mean productionis the same for the four machines and (i) test the hypothesis that the employeesdo not differ with respect to mean productivity.(Critical Value-)

| Employee | Types of Machines |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
|  | $\mathbf{M}_{1}$ | $\mathbf{M}_{2}$ | $\mathbf{M}_{3}$ | $\mathbf{M}_{4}$ |
| $\mathbf{E}_{1}$ | 4 | 3 | 4 | 3 |
| $\mathbf{E}_{2}$ | 3 | 4 | 5 | 4 |
| $\mathbf{E}_{3}$ | 3 | 3 | 4 | 3 |
| $\mathbf{E}_{4}$ | 4 | 4 | 5 | 4 |

Study the performance of three detergents at three different water temperatures, the following 'whiteness' readings were obtained with specially designed equipment Perform a two-way analysis of variance, using $5 \%$ level of significance.

| Water Temperature | Detergent A | Detergent B | Detergent C |
| :--- | :--- | :--- | :--- |
| Cold Water | 7 | 5 | 7 |
| Warm Water | 9 | 2 | 8 |
| Hot Water | $\mathbf{4}$ | 6 | $\mathbf{8}$ |

Following is the data on sales by three salesman in three states check whether there is variation in the sales of salesman in these states set ANOVA table for the same (Critical level=5.14)

| States | A | B | C |
| :--- | :--- | :--- | :--- |
| 1 | 5 | 4 | 4 |
| 2 | 7 | 8 | 5 |
| 3 | 9 | 6 | 6 |

Set ANOVA table to the data relating to the yield of wheat per acre and the types of fertilizer applied and find the variance at $5 \%$ level of significance. Table value $=5.14$

| Type of Fertilizer | Variety of whet |  |  |
| :--- | :--- | :--- | :--- |
|  | A | B | C |
| 1 | 6 | 5 | 5 |
| 2 | 7 | 5 | 4 |
| 3 | 3 | 3 | 3 |
| 4 | 8 | 7 | 4 |

Following data show academic background and choice of course of MBA students. Test a hypothesis of whether academic influence choice of course at $5 \%$ level of significance.

| Course | Accounting | Finance | Marketing |
| :--- | :--- | :--- | :--- |
| BA | $\mathbf{2 2}$ | $\mathbf{1 0}$ | $\mathbf{0 8}$ |
| BBA | $\mathbf{1 0}$ | $\mathbf{1 8}$ | $\mathbf{2 5}$ |
| BSc | $\mathbf{3 0}$ | $\mathbf{1 2}$ | $\mathbf{1 0}$ |

Use the Wilcoxon sign test at $5 \%$ level of significance to test the researchers claim that the new feed is effective in increasing the weight for the data given below.( Critical Value- 2)

| Weight before | $\mathbf{1 2 5 0}$ | $\mathbf{1 1 7 5}$ | $\mathbf{1 4 0 0}$ | $\mathbf{1 3 8 0}$ | $\mathbf{1 2 8 0}$ | $\mathbf{1 5 1 0}$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Weight after | $\mathbf{1 4 0 0}$ | $\mathbf{1 3 5 0}$ | $\mathbf{1 3 9 0}$ | $\mathbf{1 2 5 0}$ | $\mathbf{1 3 1 0}$ | $\mathbf{1 4 5 0}$ |

Use the Wilcoxon sign test at $5 \%$ level of significance to test the coaching institute's claim their coaching helps the SAT score.(Critical Value-4)

| Score before coaching | $\mathbf{9 5 0}$ | $\mathbf{1 1 0 0}$ | $\mathbf{8 7 5}$ | $\mathbf{1 2 0 0}$ | $\mathbf{1 2 8 0}$ | $\mathbf{1 3 0 0}$ | $\mathbf{1 4 1 0}$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Score before coaching | $\mathbf{1 0 5 0}$ | $\mathbf{1 1 2 0}$ | $\mathbf{9 0 0}$ | $\mathbf{1 1 9 0}$ | $\mathbf{1 3 0 0}$ | $\mathbf{1 3 1 0}$ | $\mathbf{1 3 9 0}$ |

Use the Wilcoxon sign test at $5 \%$ level of significance to test the claim that the new diet is effective in reducing weight..( Critical Value- 11)

| Weight before <br> diet | 180 | 178 | 165 | 200 | 160 | 145 | 170 | 210 | 185 | 155 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Weight after <br> diet | 174 | 181 | 157 | 198 | 152 | 150 | 160 | 205 | 178 | 160 |

The data below shows the salaries (in $000 \$$ ) in randomly selected advertisements in two different occupations. Use the MannWhitney test at $\mathbf{1 \%}$ level of significance to test that the median salary in the fields of education is lower than the median salary in the fields of marketing.

| Education (X) | $\mathbf{2 2}$ | $\mathbf{4 0}$ | $\mathbf{1 8}$ | $\mathbf{2 5}$ | $\mathbf{1 5}$ | $\mathbf{2 3}$ | $\mathbf{1 6}$ | $\mathbf{1 9}$ | $\mathbf{2 1}$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Marketing (Y) | $\mathbf{2 8}$ | $\mathbf{2 4}$ | $\mathbf{2 0}$ | $\mathbf{4 5}$ | $\mathbf{5 0}$ | $\mathbf{3 9}$ | $\mathbf{2 6}$ | $\mathbf{5 5}$ | $\mathbf{4 8}$ |

A group of 15 students is divided into 3 groups: 1, 2, 3 and each group is afforded a different motivating rationale for excelling in a Maze test. Use Kruskal-Wallis test to determine if there is

| Group 1 | 20.1 | 26.0 | 33.7 | 34.3 | 37.5 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Group 2 | 18.7 | $\mathbf{1 9 . 4}$ | 24.4 | 29.1 | 37.8 |
| Group 3 | 26.7 | 38.5 | 44.1 | 45.2 | $\mathbf{5 0 . 7}$ |

Two groups of trainees are given coaching by a two teachers $X$ and $Y$. at the end of three months coaching period, they were given a test and their scores are as follows. Use Kruskal-Wallis test to determine if there is significant difference in the coaching
of two teachers at $\mathbf{5 \%}$ level of significance.

| Teacher X | $\mathbf{8 0}$ | $\mathbf{8 3}$ | $\mathbf{7 9}$ | $\mathbf{8 5}$ | $\mathbf{9 0}$ | $\mathbf{6 8}$ | $\mathbf{9 1}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Teacher Y | $\mathbf{9 3}$ | $\mathbf{6 5}$ | 77 | $\mathbf{7 8}$ | $\mathbf{8 8}$ | $\mathbf{6 7}$ | $\mathbf{8 6}$ |

Find Chi-square from the following information at $5 \%$ level of significance (critical Value-3.84).

| Condition of Child | Males | Females | Total |
| :--- | :--- | :--- | :--- |
| Clean | $\mathbf{7 0}$ | $\mathbf{5 0}$ | $\mathbf{1 2 0}$ |
| Fairly | $\mathbf{8 0}$ | $\mathbf{2 0}$ | $\mathbf{1 0 0}$ |
| Dirty | $\mathbf{3 5}$ | $\mathbf{4 5}$ | $\mathbf{8 0}$ |
| Total | $\mathbf{1 8 5}$ | $\mathbf{1 1 5}$ | $\mathbf{3 0 0}$ |

For a given 150 observations classified by two attributes $A$ and $B$ as follows. Use the Chi-square test whether $A$ and $B$ are associated.

|  | $\mathbf{A}_{1}$ | $\mathbf{A}_{2}$ | $\mathbf{A}_{3}$ | Total |
| :--- | :--- | :--- | :--- | :--- |
| $\mathbf{B}_{1}$ | $\mathbf{4 0}$ | $\mathbf{2 5}$ | $\mathbf{1 5}$ | $\mathbf{8 0}$ |
| $\mathbf{B}_{2}$ | $\mathbf{1 1}$ | $\mathbf{2 6}$ | $\mathbf{8}$ | $\mathbf{4 5}$ |
| $\mathbf{B}_{3}$ | $\mathbf{9}$ | $\mathbf{9}$ | $\mathbf{7}$ | $\mathbf{2 5}$ |
| Total | $\mathbf{6 0}$ | $\mathbf{6 0}$ | $\mathbf{1 5 0}$ | $\mathbf{1 5 0}$ |

An oil company has explored three different areas for possible oil reserves. The results of the test were as given below: do the three areas have the same potential at $5 \%$ level of significance:

| Treatment | Area |  |  | Total |
| :--- | :--- | :--- | :--- | :--- |
|  | A | B | C |  |
| Strikes | 7 | 10 | 8 | $\mathbf{2 5}$ |
| Dry Holes | $\mathbf{1 0}$ | $\mathbf{1 8}$ | $\mathbf{9}$ | $\mathbf{3 7}$ |
| Total number of test wells | $\mathbf{1 7}$ | $\mathbf{2 8}$ | $\mathbf{1 7}$ | $\mathbf{6 2}$ |

In a college one student are graded according to their I.Q and economic conditions. Use chi square test to find out whether there is any association between tow variable at $5 \%$ level of significance. Table value $=5.99$.

| Economics condition | I Q |  |  |
| :--- | :--- | :--- | :--- |
|  | High | Medium | Low |
| Rich | 160 | 300 | 140 |
| Poor | 140 | 100 | 160 |

The ranks of 12 persons before and after the training are as follows. Find the Rank Correlation Coefficient:

| Rank Before | $\mathbf{1 , 2 , 3 , 4 , 5 , 6 , 7 , 8 , 9 , 1 0 , 1 1 , 1 2}$ |
| :--- | :--- |

Rank After $12,9,6,10,3,5,4,7,8,2,11,1$
Calculate Spearman's Rank Correlation coefficient between A and RSeries:

| Rank of A | $2.5,5,6,7,8,9,1,4,2.5$ |
| :--- | :--- |
| Rank of B | $3,5,6.5,6.59,8,1,4,2$ |

Calculate Rank Correlation Coefficient from the following data.

| Father's Height | $\mathbf{6 , 6 3}, 67,64,69,62,70,66,68,67,69,69,71$ |
| :---: | :--- |
| Son's Height | $\mathbf{6 8 , 6 6}, 68,65,69,66,68,65,71,67,68,70$ |

552 Evaluate the steps involved in factor analysis ..... 10
353 Evaluate the steps involved in hypothesis testing. ..... 10
$5 \quad 54$ Briefly explain the steps in report writing. ..... 10

## St. Philomena's College (Autonomous) Mysore <br> III Semester M.A. Final Examination November 2019 <br> Subject: ECONOMICS <br> Title: RESEARCH METHODOLOGY AND DATA ANALYSIS (HC)

Time: 03 Hours
Max Marks:70
PART - A

## Answer any FIVE of the following :

1. a. What is Research?
b. State hypothesis?
c. Distinguish between Univariate and multivariate analysis.
d. Write the difference between Type I and Type II error.
e. State probability sampling techniques.
f. What is factor analysis?
g. Define Non-parametric tests.
h. What are types of report?

## PART - B

## Answer any SIX of the following:

$6 \times 5=30$

## 2. Explain various types of research.

3. Write a note on Sampling techniques.
4. Write the difference between parametric and non-parametric test.
5. Two types of drugs were used on patients for reducing their weight. Drug $A$ was imported and Drug B indigenous. The decrease in the weight after using the drugs for six months has follows:

| Drug A | 10 | 12 | 13 | 11 | 14 | - | - |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Drug B | 8 | 9 | 12 | 14 | 15 | 10 | 9 |

Is there a significant difference in its efficacy of two drugs? If not, Which drug should you buy? (table value at $5 \%=2,223$ )
6. Fit one way ANOVA table at $5 \%$ level of significance. (Table value $2.9=4.26$ )

| Variety |  |  |
| :--- | :--- | :--- |
| $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ |
| 3 | 6 | 7 |
| 4 | 3 | 3 |
| 3 | 3 | 4 |
| 5 | 4 | 6 |

PTO
7. The ranking of 10 students in two subjects, accountancy and auditing are as follows. Test at $5 \%$ level of significant.

| Accountancy | 3 | 5 | 8 | 4 | 7 | 10 | 2 | 1 | 6 | 9 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Auditing | 6 | 4 | 9 | 8 | 1 | 2 | 3 | 10 | 5 | 7 |

8. The following are the number of tickets issued by two policemen on 20 days.

By ${ }^{\text {st }}$ Policemen: $7,10,14,12,6,9,11,13,7,6,10,8,14,8,12,11,9,8,10$ and 15
By $\mathbf{2}^{\text {nd }}$ Policemen: $10,13,14,11,10,7,15,11,10,9,8,12,16,10,10,14,10,12,8$ and 4
Test whether second policemen issues more tickets than the first one at $1 \%$ level significance (Table value 0.9423 )
9. Write a note on report writing.
PART - C

Answer THREE of the following.
$3 \times 10=30$
10. Explain various steps in research.
11. Fit two ways ANOVA table and find out whether the variety difference is significant or not. Table: (Table value: $3.6=4.76 \quad 2.6=5.14$ )

| Variety of | Milk Yield |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Cows | Feed 1 | Feed 2 | Feed 3 | Feed 4 |  |
| A | 5 | 5 | 6 | 5 |  |
| B | 4 | 8 | 5 | 5 |  |
| $\mathbf{C}$ | 6 | 6 | 7 | 6 |  |
