MASTER OF SOCIAL WORK

Objectives of the Course

- 1. To provide education and training in social work to those desirous of making a career in social work practice.
- 2. To provide opportunities through intensive field practicum to work with variety of people in their development and provide service to those who are in need of it.
- 3. To provide inter-disciplinary collaboration for better understanding of human problems, services and issues related to human development.
- 4. To link theory with practice in every sphere of human service endeavors.
- 5. To develop requisite knowledge, skills and values in working with people
- 6. To promote among learners a sense of responsibility and commitment to work with different sections of people and especially of the vulnerable sections of the society
- 7. To promote opportunities and to create awareness for personal growth
- 8. To acquire knowledge and skills in undertaking practice-based research and to administer human service organizations

> SOCIAL WORK PRACTICUM

The practicum with different learning opportunities is designed to provide scope to develop and enhance professional practice skills. Learning is aided through observation, analysis of social realities and experience of participation in designing and providing social work intervention.

The tasks are organized to help the learner acquire beginning skills, practice those already acquired, and master them from simple to complex. The learner is gradually encouraged to become an independent worker, during the course of study.

Objectives

- 1. The objectives are met by providing a variety of experiences to learners to:
 - a) Develop the ability to observe and analyze social realities.
 - b) Understand the characteristics of social systems and their dynamics.
 - c) Appreciate society's response to people's needs, problems and social issues.
 - d) Develop critical understanding of the application of legislation, legal process, and social policy.

2.

- a) Develop the ability to examine the process of programme management and participate in the effort at various levels.
- b) Develop the ability to recognize the need for newer programs, initiate and participate in them.
- c) Use Human Rights tools, understanding of gender justice, and need for equity in all intervention.

- d) Develop an understanding of organizational structure, resource management, and dayto-day administration for human service programmes - developmental and welfare programmes
- e) Develop the capacity to integrate knowledge and practice-theory by participating in intervention.

3.

- a) Clarify and imbibe values which sustain positive attitude and professional ethics
- b) Develop the capacity for self-direction, growth and change through self awareness.
- 4. Enhance writing skills to document practice appropriately. Recordings to be viewed as an expression of interest, motivation and involvement in practice and as evidence of enrichment in the process of professional growth.

To meet these outcomes, several opportunities with specific objectives are designed. The different sets of opportunities with details of content and related tasks are listed separately.

INTRODUCTION

Community organization / development as a method of social work practice, is seen as a means to facilitate communities towards self-directed change. It takes as its basis the inequalities in society manifested through processes of marginalization, discrimination or disempowerment of groups, which have resulted in the loss of control over resources, be they tangible or intangible. The strategies of Community Organisation practice being addressed as part of the course cover a range spanning different ideologies, from those being people-initiated, and those that are initiated by the elite. Community organization is seen as a means as well as an end, where collective processes are to sustain the community's capacity to bring about change.

Orientation provides information regarding.

- i. the importance and place of the practicum in the educational programme.
- ii. the purpose, functions and ethics in professional practice.

In the first four weeks, the learners may make a local directory to include emergency numbers of Hospitals/ PHCs/ Police/ Panchayath Office and Network Agencies along with references to other developmental and welfare services in the location.

Visits - provide an exposure to and understanding of the services provided in responses to people's needs. (Agencies in health setting, education, community, institutional services, criminal justice system, civic administration, rehabilitation etc.)

Structured experience laboratory - is a classroom activity, which provides opportunities through the games/activities, to form the involvement of self in various practice skills. These laboratory experiences are designed in small groups to encourage participation, sharing of the experience and aid in examining learning and applications of skills. These sessions have a specific objective of experiencing self, and applying /using self in practice. (Relationship skills, Communication skills etc., will be focused)

Concurrent practice learning of two-days a week - on going learning of practice is an opportunity to develop intervention skills in reality situations. This entails learning social work practice for two, or two and a half days or its equivalent, each week of the semester.

The learners may be placed in agencies or in communities to initiate and participate in direct service delivery. Practice learning is a vital component of the educational opportunity to be provided to the learner. The teaching-learning process must be designed to help the learner to move on the mastering strategies, skills and techniques to practice social work.

SOCIAL WORK CAMP:

Rural/ Tribal camps with a duration of 7 - 10 days - provide opportunities to experience rural life, analyze rural dynamics, and observe the functioning of local self government and voluntary organisations. This experience aids peer participation in planning for activities for own group and those for local people. It also helps develop skills to carry out, evaluate, and report the experience.

SUMMER PLACEMENT:

Summer Placement - provides an opportunity to experience day-to-day work in a setting. The learner gets involved with direct practice with the client system and with the ongoing management operations of the setting. The time frame recommended for this experience is about three weeks, after the first year of the post-graduate programme.

Further, the student shall also collect the experiences or opinions of people on the issues and make a detailed presentation.

Workshops: Skills Development - help learners acquire specific skills for situations encountered during practice and acquire skills for intervention. These may be for problems/ concerns, issues or situations like work with alcoholics, HIV/AIDS affected persons, adolescents for life skills development, youth for leadership development and couples for marital relationship and enrichment work with elderly. These workshops are to enhance skills/ develop new skills for practice in specific situation, specific problems and issues.

Concurrent practice learning of two-days a week - on going learning of practice is an opportunity to develop intervention skills in reality situations. This entails learning social work practice for two, or two and a half days or its equivalent, each week of the semester. The learners may be placed in agencies or in communities to initiate and participate in direct service delivery. Practice learning is a vital component of the educational opportunity to be provided to the learner. The teaching-learning process must be designed to help the learner to move on the mastering strategies, skills and techniques to practice social work
