St.Philomena's College (Autonomous), Mysuru

St. Philomena's College was established on October 9, 1946 with the benediction of His Excellency Rt. Rev. Dr. Rene Feuga, the first Bishop of Mysore and His Highness Sri Jayachamarajendra Wodeyar, the Maharaja of Mysore. It was a feather on the cap for St. Philomena's College in becoming the first Private Degree Science College in Mysore region. Now, 75 years later, traditional programmes co-exist with contemporary courses, proliferating the student strength and infrastructure. The College has Post-Graduate Studies and Research Centre offering thirteen programmes with erudite teachers of outstanding caliber, is gearing itself to become a University.

About the Conference

Inevitability of innovation and advanced digitization has propelled organizations to be zestful, resilient and adaptive. Cloud, artificial intelligence, block chain, big data, and internet of things (IoT) are re-defining our work-life aspects. Unpredictability of events all over the world will create unique opportunities in future with enormous thrust on proliferation of technology. Digital transformation demands a shift in focus on social, economic and environmental issues.

Ecological imbalance and development without planning have caused irreparable damage to the planet earth. Mankind has a moral obligation to sustain and handover a clean, non-toxic planet to the future generation; facilitating them to access clean air, water and food at the least. Focus on sustainability globally and locally is the only solution available. Appreciation of quality life is the need of the hour. Ability to cope with stress and holistic well-being has become more important than ever before. Empowering society to achieve this is the new formed responsibility of educational institutions.

This multi-disciplinary international conference on "Digital transformation, sustainability and well-being – A New Perspective" will provide an arena for academicians, researchers, corporates, students and others to share and enrich their knowledge and exposure.

Sub Themes

- | Agriculture Sustainability in Rural Development
- | Changing Trends of Political Discourse Through Digital Media
