

In humans and other placental mammals, fertilization occurs in

- vagina
- ovary
- fallopian tubes
- uterus

The fusion of sperms with egg produces

- Zygote
- Egg
- None of these
- Both 1 and 2

The Study of Development of Zygote is known as

- Embryology
- Zoology
- Ornithology
- Physiology

Organ Formation is known as

- Organlysis
- Organogenesis
- Oogenesis
- Spermatogenesis

The Formation of Spermatids and its Differentiation into Spermatozoa is known as

- Oogenesis
- Mitosis
- Spermatogenesis
- None of these

The male gametes known as

- Egg
- Ova
- Sperms
- Acronym

A membrane helping in digesting the outer surface of the egg, called as

- Sperm
- Acrosome
- Head of Sperm
- None of these

Fertilization is carried out by the fusion
of

- Male and male gametes
- Female and Female Gametes
- Male and Female Gametes
- None of these

Zona Pellucida is Composed of

- ZP10
- ZP11
- ZP3
- ZP4

External Fertilization Occurs in

- Humans
- Amphibians
- Mammals
- Dogs
